References

The AAAI style includes a set of definitions for use in for-
matting references with BibTeX. These definitions make the
bibliography style fairly close to the ones specified in the Ref-
erence Examples appendix below. To use these definitions,
you also need the BibTeX style file “aaai2027.bst,” available
in the AAAI Author Kit on the AAAI web site. Then, at the
end of your paper but before `\enddocument`, you need to put
the following lines:

```
\bibliography{bibfile1,bibfile2,...}
```

Please note that the `aaai2027.sty` class already sets the `bib-
liographystyle` for you, so you do not have to place any `\bib-
liographystyle` command in the document yourselves. The
`aaai2027.sty` file is incompatible with the `hyperref` and `nav-
igator` packages. If you use either, your references will be
garbled and your paper will be returned to you.

References may be the same size as surrounding text. How-
ever, in this section (only), you may reduce the size to `\small`
(9pt) if your paper exceeds the allowable number of pages.
Making it any smaller than 9 point with 10 point linespacing,
however, is not allowed.

The list of files in the `\bibliography` command should be
the names of your BibTeX source files (that is, the `.bib` files
referenced in your paper).

The following commands are available for your use in
citing references:

`\cite`: Cites the given reference(s) with a full citation.
This appears as “(Author Year)” for one reference, or
“(Author Year; Author Year)” for multiple references.

`\shortcite`: Cites the given reference(s) with just the
year. This appears as “(Year)” for one reference, or
“(Year; Year)” for multiple references.

`\citeauthor`: Cites the given reference(s) with just the
author name(s) and no parentheses.

`\citeyear`: Cites the given reference(s) with just the
date(s) and no parentheses.

You may also use any of the *natbib* citation commands.

Proofreading Your PDF

Please check all the pages of your PDF file. The most commonly forgotten element is the acknowledgments — especially the correct grant number. Authors also commonly forget to add the metadata to the source, use the wrong reference style file, or don't follow the capitalization rules or comma placement for their author-title information properly. A final common problem is text (especially equations) that runs into the margin. You will need to fix these common errors before submitting your file.

Improperly Formatted Files

In the past, AAI has corrected improperly formatted files submitted by the authors. Unfortunately, this has become an increasingly burdensome expense that we can no longer absorb). Consequently, if your file is improperly formatted, it will be returned to you for correction.

Naming Your Electronic File

We require that you name your L^AT_EX source file with the last name (family name) of the first author so that it can easily be differentiated from other submissions. Complete file-naming instructions will be provided to you in the submission instructions.

Submitting Your Electronic Files to AAI

Instructions on paper submittal will be provided to you in your acceptance letter.

Inquiries

If you have any questions about the preparation or submission of your paper as instructed in this document, please contact AAI Press at the address given below. If you have technical questions about implementation of the aai style file, please contact an expert at your site. We do not provide technical support for L^AT_EX or any other software package. To avoid problems, please keep your paper simple, and do not incorporate complicated macros and style files.

Additional Resources

L^AT_EX is a difficult program to master. If you encounter issues producing correct PDF output, please consult your TeX distribution documentation (TeX Live or MiKTeX) and ensure you are using an up-to-date PDFL^AT_EX workflow. Most compilation and font issues can be resolved by updating your distribution and avoiding deprecated packages.

Reference Examples

Formatted bibliographies should look like the following examples. You should use BibTeX to generate the references. Missing fields are unacceptable when compiling references, and usually indicate that you are using the wrong type of entry (BibTeX class).

Book with multiple authors Use the @book class.

Engelmore, R.; and Morgan, A., eds. 1986. *Blackboard Systems*. Reading, Mass.: Addison-Wesley.

Journal and magazine articles Use the @article class.

Robinson, A. L. 1980. New Ways to Make Microcircuits Smaller. *Science*, 208(4447): 1019–1022.

Hasling, D. W.; Clancey, W. J.; and Rennels, G. 1984. Strategic explanations for a diagnostic consultation system. *International Journal of Man-Machine Studies*, 20(1): 3–19.

Proceedings paper published by a society, press or publisher Use the @inproceedings class. You may abbreviate the booktitle field, but make sure that the conference edition is clear.

Clancey, W. J. 1984. Classification Problem Solving. In *Proceedings of the Fourth National Conference on Artificial Intelligence*, 45–54. Menlo Park, Calif.: AAI Press.

Clancey, W. J. 1983. Communication, Simulation, and Intelligent Agents: Implications of Personal Intelligent Machines for Medical Education. In *Proceedings of the Eighth International Joint Conference on Artificial Intelligence (IJCAI-83)*, 556–560. Menlo Park, Calif: IJCAI Organization.

University technical report Use the @techreport class.

Rice, J. 1986. Poligon: A System for Parallel Problem Solving. Technical Report KSL-86-19, Dept. of Computer Science, Stanford Univ.

Dissertation or thesis Use the @phdthesis class.

Clancey, W. J. 1979. *Transfer of Rule-Based Expertise through a Tutorial Dialogue*. Ph.D. diss., Dept. of Computer Science, Stanford Univ., Stanford, Calif.

Forthcoming publication Use the @misc class with a note="Forthcoming" annotation.

```
@misc(key,  
[...]  
note="Forthcoming",  
)
```

Clancey, W. J. 2021. The Engineering of Qualitative Models. Forthcoming.

ArXiv paper Fetch the BibTeX entry from the “Export Bibtex Citation” link in the arXiv website. Notice it uses the @misc class instead of the @article one, and that it includes the eprint and archivePrefix keys.

```
@misc(key,  
[...]  
eprint="xxxx.yyyy",  
archivePrefix="arXiv",  
)
```

Website or online resource Use the `@misc` class. Add the url in the `howpublished` field and the date of access in the `note` field:

```
@misc(key,
      [...]
      howpublished="\url{http://...}",
      note="Accessed: YYYY-mm-dd",
)

Acknowledgments

AAAI is especially grateful to Peter Patel Schneider for his work in implementing the original `aaai.sty` file, liberally using the ideas of other style hackers, including Barbara Beeton. We also acknowledge with thanks the work of George Ferguson for his guide to using the style and BibTeX files — which has been incorporated into this document — and Hans Guesgen, who provided several timely modifications, as well as the many others who have, from time to time, sent in suggestions on improvements to the AAAI style. We are especially grateful to Francisco Cruz, Marc Pujol-Gonzalez, and Mico Loretan for the improvements to the BibTeX and L^AT_EX files made in 2020.

The preparation of the L^AT_EX and BibTeX files that implement these instructions was supported by Schlumberger Palo Alto Research, AT&T Bell Laboratories, Morgan Kaufmann Publishers, The Live Oak Press, LLC, and AAAI Press. Bibliography style changes were added by Sunil Issar. `\pubnote` was added by J. Scott Penberthy. George Ferguson added support for printing the AAAI copyright slug. Additional changes to `aaai2027.sty` and `aaai2027.bst` have been made by Francisco Cruz, Marc Pujol-Gonzalez, and Mico Loretan.

Thank you for reading these instructions carefully. We look forward to receiving your electronic files!
